- AsyncIO
- FastAPI
- Sanic
- CSS
- SQL
- Mysql
- Djnago
- Cassandra
- MongoDB
- GraphQL
- Linux
- pytest
- Test Automation
- Tornado

Experience

ITC DaVinci

Software Developer • Vologda

01/2018 - 08/2019

My responsibilities included: developing the admin panel on Flask, designing the database (PostgreSQL), and designing the mobile API on GraphQL. Test coverage of existing code. Later, he worked on integrating the GraphQL API and the Ionic application.

PAPARA.RU

Backend Developer • Vologda

01/2019 - 08/2019

PAPARA.RU-photo service that accepts orders in Russia for printing and manufacturing Souvenirs, photos, etc.

In this company, I came to an existing project (it was ~5 years old). I immediately discovered the problem of a large technical debt, so I talked to the Manager and made a small plan for refactoring. As a result, after 6 months of slow implementation of features and execution of current tasks, the legacy code was eliminated.

In this project I used:

- Django,
- Celery,
- DRF,

- MySQL

SELECTEL

Backend Developer • St Petersburg

07/2019 - 03/2020

Selectel is a Russian technology company that provides cloud infrastructure services and data center services.

While working at Selectel, I was developing a part of the corporate portal for internal needs. I have been developing it from the very beginning, so I designed the database for the project, as well as the API. In the project, I applied:

- FastAPI,
- SQLAlchemy (PostgreSQL),
- Dramatiq (RabbitMQ),
- PyTest, as well as several other modern tools.

Elastoo

Backend Developer • St Petersburg

04/2020 - Present

I work in FINTECH projects

- FastAPI
- AsyncIO
- MongoDB

Languages

- English
- Polish
- Russian
